Executive Summary

The company completed a strong first half of 2026 with revenue growth of 35.9% year-over-year. All product lines showed positive momentum except Data Migration, which declined as expected due to the completion of major client onboarding projects.

Engineering headcount grew to 10 across three teams (Core Platform, DevOps, and Frontend). Key hires include two senior engineers and an architect, strengthening our capacity for the planned microservices migration in Q3.

Customer satisfaction reached an all-time high with NPS of 58, up from 45 at the start of the year. Churn rate decreased from 2.0% to 1.5%, driven by improved onboarding workflows and the launch of the priority support tier.

Looking ahead to H2, the primary focus areas are: (1) completing the platform migration to microservices, (2) launching the mobile companion app, and (3) expanding into the Nordic market with localized offerings.

Quarterly KPIs

KPI	Q1 Target	Q1 Actual	Q2 Target	Q2 Actual
Revenue (EUR)	140000	142600	155000	157000
New Customers	12	15	14	18
